PROFILE

I'm Web Engineer with a background in TypeScript and extensive experience in full-stack web development, I am confident in my ability to deliver high-quality results on this project.

I'm Web Engineer with good experience in developing user interfaces, testing, debugging, and functionalities staff within E-Commerce technologies. Proven ability in optimizing web functionalities that improve data retrieval and workflow efficiencies.

My expertise lies in developing robust and scalable applications using the full stack. I have a deep understanding of TypeScript and its benefits, including improved code quality, enhanced type checking, and better maintainability. My experience includes developing RESTful APIs, integrating third-party APIs, and building efficient database schemas.

I am well-versed in front-end development technologies like React, Redux, and Angular, and have experience in developing responsive web applications using CSS and HTML. I am also familiar with back-end technologies such as Node.js, Express.js, and MongoDB, and have experience in building RESTful APIs using these technologies.

Throughout my career, I have worked on numerous web development projects, both large and small. I am a strong communicator and collaborate effectively with clients and team members to deliver projects on time and within budget. I am proactive in identifying and resolving issues that arise during the development process, and I am always looking for ways to optimize performance and enhance user experience.

I believe that my skills, experience, and passion for software development make me an ideal candidate for this position. I look forward to the opportunity to discuss this project further and demonstrate how I can contribute to your team.

WORK EXPERIENCE

Front-End Developer

Upwork   2020-2021

- Designed and implemented responsive layouts for desktop and mobile devices.
- Collaborated with the marketing team to create landing pages and email templates.
- Improved website performance by optimizing images, minifying code, and implementing caching.
- Implemented A/B testing and analyzed user data to improve conversion rates.
- Developed and maintained a pattern library and style guide to ensure consistency across the website.
- Integrated third-party APIs such as Google Maps, Stripe, and Mailchimp.

Full-Stack Developer

Upwork   2021-2023

- Implemented rich user experiences by creating 30+ new features utilizing HTML/JS/CSS.
- Developed and maintained 30+ REST APIs writing documentation using OpenAPI specifications.
- Followed industry best practices, company best practices, and learned 3 new technologies.
